Adult Dose guidance

Start as low as possible with one night time dose, then every 4 to 12 hours as needed. Maximum dose: 950mg/day per 75Kg body mass.

Once response to therapy is determined, dose and frequency should be adjusted to the lowest effective dose for the shortest duration possible to suit the individual treatment goals.

Do not use when operating heavy machinery or whilst driving. Do not use if under the age of 18 without medical consultation.

0.5mg THC tinctures and 1.0mg THC tinctures are used as a starting point for first time users. or as a general maintenance/prevention dose.

The 2.5mg THC/drop tincture is used for users with previous cannabis use and more severe medical cases. For severe medical cases, including a start for cancer treatment, dosage is based on a standard body weight of 75kg up to a saturated dose of 950mg THC.

Always work to a comfortable level, start low and slow. Tolerance to higher level dosage builds up in most cases so adjust your dosage accordingly to a level that feels comfortable for you. Maximum dosage is 950mg per 75kg per 24 hours.

If any signs of adverse reactions please stop using this product and if needed consult a trained health professional.

Storage

It is recommended that you store the tinctures in cool dark place with the dropper tightly closed to avoid contamination.
